

INSTANT TONE SANITIZER

Laughter in the face of adversity is the true sound of perseverance.

Riff Instant Tone Sanitizer is a limited edition discrete Class-A Preamp designed to crank smiles and boost spirits during these unique and challenging times. As part of a proactive harmonic health regime, Riff safeguards against the omnipresent threat of tonal anemia and ensure optimal signal chain performance when used as directed.

Alexander Pedals has donated \$10 from each sale of Riff Instant Tone Sanitizer to Inter-Faith Food Shuttle to help make a tangible difference in the real lives of those affected.

Controls:

Kills — Controls the output volume of the boost. Crank it to overdrive your tube amp.

Most — Adjusts the high frequency content of the boosted signal. The "neutral" setting is around 2 o'clock.

Germ* — Set low for transparent and glassy boost. Or set it higher for fat and juicy boost. Your call.

*Riff Instant Tone Sanitizer does not kill germs. Riff is for display purposes only.

Bypass Switching: The Riff Sanitizer features true bypass switching using a latching relay and a soft-touch bypass footswitch.

Power Supply: Riff Instant Tone Sanitizer requires a 9V DC power supply with a 2.1mm pin, center negative. Riff is not designed to be powered on supplies higher than 9V and does not use a battery. Riff should work fine on a multi-pedal "daisy chain" connector, but if you encounter excessive noise or hum try a separate power supply. Riff requires approx. 12mA.
